Incident Investigation Notes

Finding name: [2.1]Brute Force Access Behavior Detected from 172.16.16.245

Analyst assigned: Ashley

Description of System(s)	
Type (Laptop/Desktop/Server/VM/etc.	**[2.2.a]** Main-Inv -> Windows/Server Inventory & sales data Dbell -> Windows Desktop
System Operating System	**[2.1.b, 2.2.a]** all 4 targets identified are windows devices: Ppark, JSam, Main-Inv
System Name	**[2.1.b]** 4 targets identified: Dbell, Ppark, JSam, Main-Inv **[2.2.a]** 2 compromised: Dbell and Main-Inv
System IP Address	**[2.2.a]** Main-Inv -> 192.168.55.3 (static) Dbell -> 192.168.16.34 (DHCP)
Other hosts involved: Hostname/IP address	**[2.1.a]** VPN client-tunnel IP 172.16.16.245 **[2.2.b]**Malicious file downloaded from 13.107.4.50

User information (as applicable)	
User(s) involved in incident	**[2.1.b]** tshirt_admin is the compromised account/showed successful login.
Other user(s) alias involved	**[2.2.b]** WeSellTshirts is the account linked to the VPN client

MITRE ATT&CK info	
Tactic / Technique - ID	**[2.1]** Credential access/Brute Force – T1110 Discovery/Password Policy Discovery - T1201

Incident Investigation Notes

Investigation Details
[2.2.b]: IP 172.16.16.254 failed authentication multiple times, 2 successful events Main-Inv downloaded a .bin file from 13.107.4.50 that is potentially related to Clop malware. An encoded powershell command is seen in this transaction too. No machine logs available to investigate further

Additional Artifacts
[2.1, 2.1.a]: IP 172.16.16.254 failed authentication multiple times, 2 successful events. This IP is from a VPN that allows a partner to connect to some internal services. The partner username for the tunnel was “weselltshirts”.
[Lesson 2.2.b]: Destination IP 13.107.4.50 related with malware download.

Final Analysis
[2.2.b] • **Who**: Partner VPN account was used to gain access to internal assets dbell and main-inv. • **What**: Machines were infected with Clop Malware/Ransomware • **Where**: Main-Inv and DBell were compromised • **When**: Yesterday (Provide exact date here in real investigations) • **Why**: Dbell has elevated access to certain applications and Main-Inv has important inventory customer information.
